### Maintenance

Acetylated wood weathers a natural silver-gray if left untreated, outdoors. If you prefer the original look, scrub with a bleach or detergent solution. When dry, apply a tinted, nontoxic penetrating stain, then apply a nontoxic mildewcide to minimize mildew growth.

Periodically inspect for splinters, broken or loose parts, and/or malfunctions. Remove from service when any condition develops that might make operation unsafe.

### Cleaning

Mud and dirt can be removed with scrub brush and water. Over time in outdoor settings surface may blacken with mildew. A bleach solution or safe detergent can be used to remove blackness.

### Construction

The wooden components are manufactured from long lasting acetylated wood and finished with a tinted nontoxic stain. All edges and corners are rounded for safety and ease of cleaning.

Stainless steel hardware is used throughout and plastic components are formulated to ensure long life in outdoor environments.

### User Modifications

We are not responsible for modifications made by customers to our products in the field, without our supervision, testing or evaluation.
