## Maintenance

Acetylated wood weathers a natural silver grey if left untreated outdoors.

If you prefer the original look, scrub with a bleach or detergent solution. When dry, apply a tinted, nontoxic penetrating stain, then apply a nontoxic mildewcide to minimize mildew growth.

Periodically inspect for splinters, broken or loose parts, and/or malfunctions. Remove from service when any condition develops that might make operation unsafe.

## Cleaning

Mud and dirt can be removed with scrub brush and water. Over time outdoors, surfaces may blacken with mildew. Remove with detergent or a bleach solution.

## Construction

The wooden components are manufactured from long lasting acetylated wood and finished with a water based stain. All edges and corners are rounded for safety and ease of cleaning.

End grain is protected by plastic guards. Stainless steel hardware is used throughout and plastic components are formulated to ensure long life in outdoor environments.
